## **Blair Atholl Risk Assessment 2024**

Name of activity, event, and location	Animation, Target Park, Blair Atholl Jamborette	Date of risk assessment	1 July 2024	Name of person doing this risk assessment	Sam Clark
		Date of next review	1 July 2026		

What could go wrong? What hazard have you identified? What are the risks from it?	Who is at risk?	What are you going to do about it? How are the risks already controlled? What extra controls are needed? How will they be communicated to young people and adults and remain inclusive to all needs?	<b>Review &amp; revise</b> What has changed that needs to be thought about and controlled?
A hazard is something that may cause harm or damage. The risk is the harm that may occur from the hazard.	For example: young people, adult volunteers, visitors	<b>Controls</b> are ways of making the activity safer by removing or reducing the risk. For example, you may use a different piece of equipment or you might change the way you do the activity.	Keep <b>checking</b> throughout the activity in case you need to change what you're doing or even <b>stop</b> the activity. This is a great place to add comments which will be used as part of the review.
Slips, trips and fallsExplorers and LeadersAll electrical wires to be secured and taped to tables Floor area to be kept clear of debris Benches and chairs to be used properly			
Small parts(Lego) Explorers and		Remind young people to use all equipment appropriately and keep Lego

Individual Needs		Leader in charge to have considered individauls and made adjustments	
Exclusion, injury	Explorers and	to make activity accessible	
	Leaders	All adults aware of individuals with specific needs and any specific measures in place	
Minor cuts / puncture wounds from Scissors or paper	Explorers and Leaders	Briefing of scouts prior to activity starting. Adult supervision. First Aid provision at Kastle	

Don't forget, as part of your programme planning, you should have contingency activities in reserve just in case you can't do what was planned or you need to stop half way through. Make sure this is shared with those involved, so everyone knows how to respond. You should have risk assessed contingency activities prior to them taking place and communicated key information to those involved as with all activities.
